Re : 22<sup>nd</sup> Annual Congress « AFC Cytometry 2018 »  
Exhibition and sponsorship

Dear Sir or Madam,

**The 22<sup>nd</sup> Association Française de Cytométrie Annual Congress will be held from 17 to 19 October 2018, at the Palais des Congrès, in Lyon.**

Lyon, the capital of the Auvergne, Rhône-Alpes region, has a long standing tradition of life science/health research and industrial development, this is reflected by the presence in Lyon of world class health industrials, innovation SME's and an outstanding teaching and research university.

The scientific program will offer a large variety of conferences covering many disciplines: Infection and Cancer immunity, haematology and microbiology.

The new themes evolving around the Microbiome, from technological innovations to therapy will also be highlighted. A particular focus will be given to data analysis and quality controls.

This event should gather between 200-300 participants, researchers, lecturers, students, hospitals and university professionals, as well as health's industrials experts.

As you know, the quality of this event can only maintained thanks to your support. The program has been design to allow generous time for participants to visit the stands and discover the commercial exhibition. Hence, the exhibition will be a perfect opportunity to interact with current or future users.

Moreover, the plenary session « **Parole aux industriels** » is maintained and will enable you **to promote your innovations** or to invite people if you desire.

You will find attached a stand reservation form and a sponsoring document. However, we'd like to underline that the mentioned provided services and costs are only indicative and that we would be willing to consider any other form of sponsoring you may want to offer.

For any additional information, please contact:
