Dear colleague,

The 13th International Congress of the European Association of Veterinary Pharmacology and Toxicology (EAVPT) will be held in the “Cité Nantes Events Center” in Nantes (France) from 19 to 22 July 2015. (for information see www.alphavisa.com/eavpt/2015/)

It is my pleasure to invite you on behalf of the EAVPT organizing committees to participate in this 13th Congress as partner, sponsor or visitor.

The EAVPT Congress is held every three years and is a great international scientific meeting attracting usually over 400 participants from all over the world. The EAVPT Congress aims to present new research concepts and tools within the field of veterinary pharmacology and toxicology (including regulatory toxicology). At the same time this Congress provides the unique opportunity to bring together representatives from academia, industry and regulatory authorities.

In our veterinary pharmacology and toxicology field, the impact of targeted research (both fundamental and applied) conducted in industry is of outmost importance. Therefore, the organizing committee of the Congress will offer specific opportunities including special sessions and workshops for the presentation of new products and/or therapeutic concepts arising from industry research (see preliminary programme outline). Some relevant keywords referring to specific sessions already confirmed are given in the 1st announcement, which can be downloaded from the website. An update with keynote speakers and workshop coordinators will be presented soon on the same website. We hope you find these subjects interesting.

To facilitate your participation, the sponsor opportunities are given below, and we hope that these proposals meet your needs and expectations. Please feel free to contact me directly or via the organizing office for any additional suggestions or requirements you might want to discuss.

On behalf of the organizing committee, we would like to thank you for consideration and we are looking forward to your participation in the EAVPT 2015 Congress.

Professor Jean-Claude Desfontis

Chair of the executive committee
