

# ECM 2011

## VI<sup>th</sup> European Congress of Mammalogy

Université P. et M. Curie - Muséum national d'Histoire naturelle  
Paris – 19 to 23 July 2011

### **13. Systematics and barcoding**

*G. Veron & M. Ruedi*

Papers in this session will be concerned with any aspects of molecular systematics and barcoding of mammalian species. Particularly welcome are contributions that place the systematics of mammals in a broader understanding of mammalian evolution. We will also consider the use of barcoding approaches to help delineate species limits or to identify cryptic taxa, especially in European mammals. The description of new non-invasive sampling techniques and of new methods to improve DNA extraction from museum specimens could be presented too.
