Re: First EURO-KiDs Congress - Paris, 6-8 July 2020

Exhibition and sponsorship

Madam, Sir,

Paris, the everlasting capital of culture and arts, is proud to host the first edition of the EURO-KiDs Congress. We felt this European meeting as mandatory because previous international IKDS conferences had mostly targeted so far physicians from Eastern Asia and the United States, and could not provide enough accessibility to European countries. Even if more frequent in Asian countries, Kawasaki disease affects 5-15/100.000 children under 5 years every year in European countries and continues to affect the heart in up to 40% of them with irreversible damage in up to 5%. This event will be held from Monday 6 to Wednesday 8 July 2020 and will take place at the 'Cité Internationale Universitaire', where students from all over the world can enjoy the French life style in a green and peaceful setting. Attendees will appreciate networking inside the sumptuous 'salon Honorat', and will enjoy the proximity of public transportation and affordable hotels in this area.

The scientific program contains two parts:

- 1-A Half-day industry-sponsored Workshop: 'Innate immunity in the pathophysiology of autoinflammatory diseases' aimed to gather experiences on new treatment targets, biomarkers, data repositories, outcome measures, and integrated research strategies ;
- 2-Two-day main meeting aimed to update on clinical innovations, recommendations, basic science, and to give the opportunity sharing clinical experiences. The mains topics will include epidemiology, genetics, pathogenesis, diagnosis, risk factors, management, cardiac complications, and outcome. Sessions will also be dedicated to interactive presentation of difficult cases and best oral communications.

This program will offer the opportunity to discuss both scientifically and technically. The organizing committee expects to welcome between 350 and 450 participants from all over the world, researchers, students, clinicians and practitioners as well as professionals of the health industry.

As you know, this event can only exist with your support. In the program, we have left time slots for stands visits before each thematic session, but also during coffee breaks and breakfast, to allow participants to see trade exhibition. We hope that you will participate in the animation of the half-day workshop. We invite you to submit the theme of your choice to the organizing committee and if accepted you will be free to choose your speakers for whom you are engaged to cover the whole of their participation to the congress.

Please find attached a registration form for the exhibition and a sponsorship application form. Nonetheless, we would like to point provided out that, the proposed services and rates are as an indication and that we are ready to consider any other form of sponsorship you would like to offer us.

For any additional information, please contact:
